2024 Annual Report

From the Founder's Desk

As we close 2024, the 1st year of Odenwald Clinic, I am filled with gratitude for the journey we have started. My dreams to provide accessible and quality healthcare has now become a reality, serving our community with dedication and compassion.

A major milestone this year was the introduction of government health insurance (MUSA) in August, which significantly increased the number of patients we serve and reinforced the trust our community places in us.

Our commitment remains strong and look ahead to expanding into a full hospital, I invite you to join us in shaping a healthier future for all.

With appreciation,
Noel Odenwald Sibomana
Founder, Odenwald Clinic

The Reception Desk

The Clinic’s Background

Is a Community Benefit Company (CBC), the project of homeforhoperw.org and some board members; It is a direct response to the healthcare challenges faced by remote communities, where families endure long distances to access medical services, leading them to rely on traditional medicine and home births due to the lack of nearby health centers and financial constraints.

The creation of this project focus to empower these communities by establishing the Health services, and raising awareness about preventive healthcare. The collaboration with all health insurance providers, particularly the Rwandan government health insurance (Mutuel de Santé).

It is aiming to reduce the financial burden on patients and minimize travel distances for healthcare services to community.

The Odenwald Clinic opened its doors on December 13, 2023, Our dedicated team is committed to delivering high-quality medical services at affordable rates, 7 days a week (Monday – Sunday) From 8:00 am to 20:00 pm and 24hours will come soon.

The Will of the community

Before

After

We have included two photos to emphasize the community's urgent need for healthcare services and their determination to find solutions. The old building was constructed by the community as a self-initiated effort (Umuganda) but remained unused for over four years. Recognizing this need.

Home for Hope Foundation (homeforhoperw.org) partnered with **Kigali City** to transform the facility into a fully operational healthcare center, bringing essential medical services closer to those in need.

Why We Exist

- To increase accessibility to healthcare services in the community.
- To create job opportunities as we will keep expanding our healthcare project.
- Establish a medical education center (research).
- Generate sustainable income to support charity activities, especially education of the orphan children through the Home for Hope Foundation.

Mission

To improve the health of our community and the world. we are committed to provide excellent care to every patient by setting the standard in integrated clinical practice, education and research.

Vision

To lead in disease diagnosis and Treatment, train the next generation of healthcare professionals and researchers.

The Services we are offering:

The Odenwald Clinic

is dedicated to making a meaningful impact in our health community so we are focusing to increase more services including:

* Antenatal Care + Post Natal Care
*Vaccination
*Integrated Management of childhood Illnesses (IMCI)

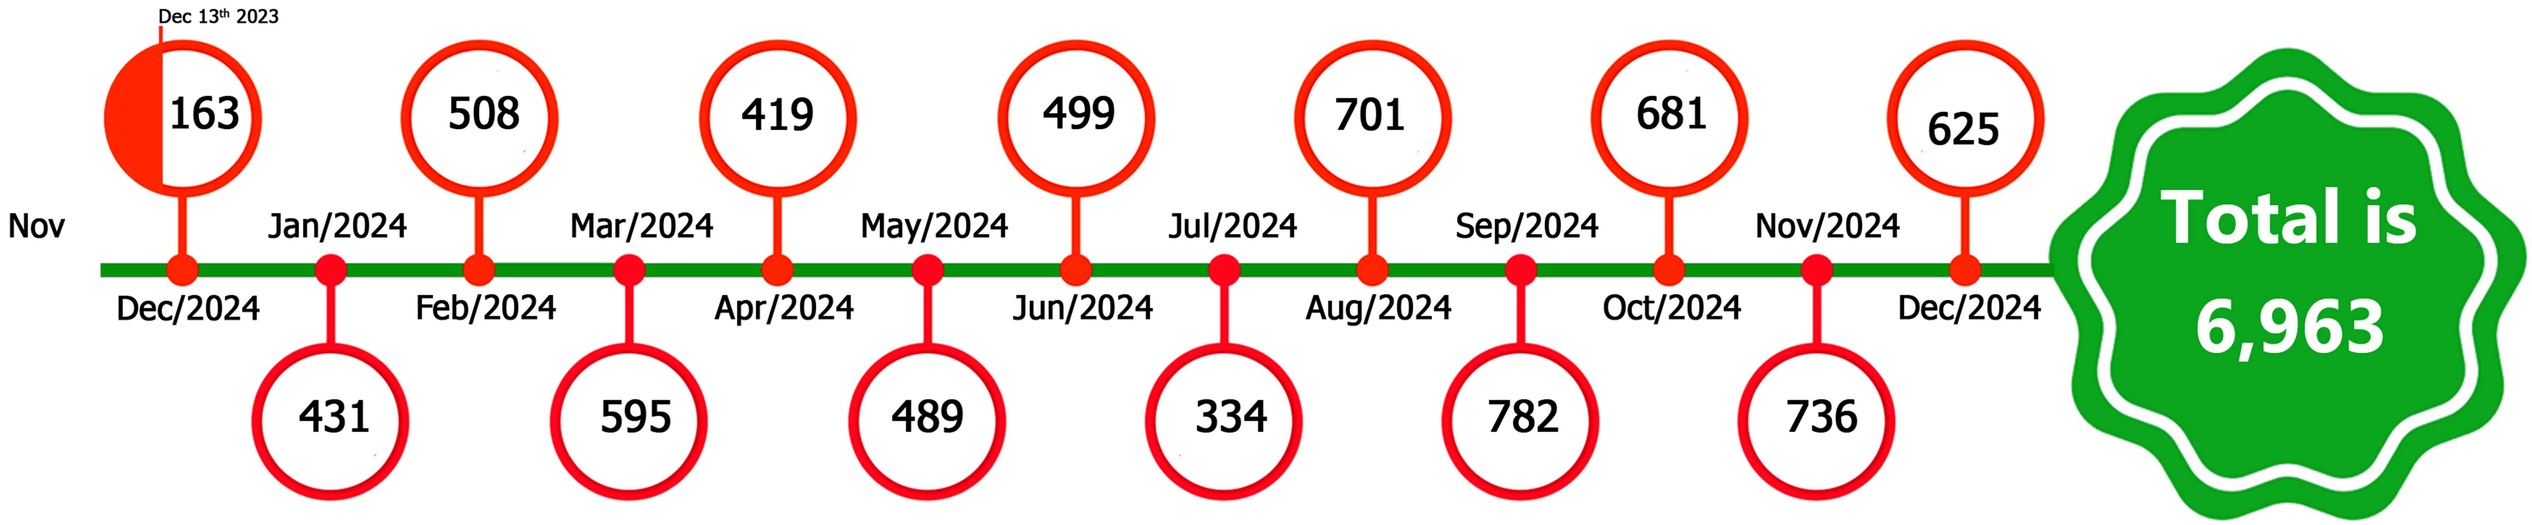

- Consultation + Primary Care of Diseases
- Minor surgery & Suture
- Laboratory tests
- Family planning (P.F)
- Male Circumcision
- Dental Services
- Child Growth Monitoring + Support of Malnourrished children
- Community Sensitization on Hygiene + Sanitation

Patient Statistics for 2024, at Odenwald Clinic

We have remained committed to our mission of providing quality healthcare services to the community. Below, we present a month-by-month breakdown of the number of patients received in from Dec 13th 2023 - Dec 31st 2024, reflecting both the growing trust in our services and the increasing healthcare needs of the population.

Throughout the year, our clinic has served individuals across various medical disciplines, including **primary care diseases—especially malaria, dental services, minor surgery & suturing, male circumcision, family planning, and more**. This demonstrates our dedication to improving access to essential healthcare and strengthening our impact in the community.

Notably, since August, when we began working with the government health insurance program MUSA (Mutuelle de Santé), the number of patients has doubled plus. This surge further highlights the critical role of Odenwald Clinic in addressing

Male Circumcision Campaign

In August, Odenwald Clinic successfully conducted a **male circumcision campaign**, led by **Nurse Ngarambe Kazungu,** a seasoned professional with over **20 years of experience.** During this initiative, we provided **circumcision services to 64 patients**, addressing a crucial healthcare need within the community.

Circumcision is widely recognized for its role in reducing the risk of **sexually transmitted infections (STIs),** contributing to overall public health. Given the high demand and positive impact of this campaign, we plan **to organize similar initiatives in the future** to ensure more individuals can access this essential service.

Insurance Office

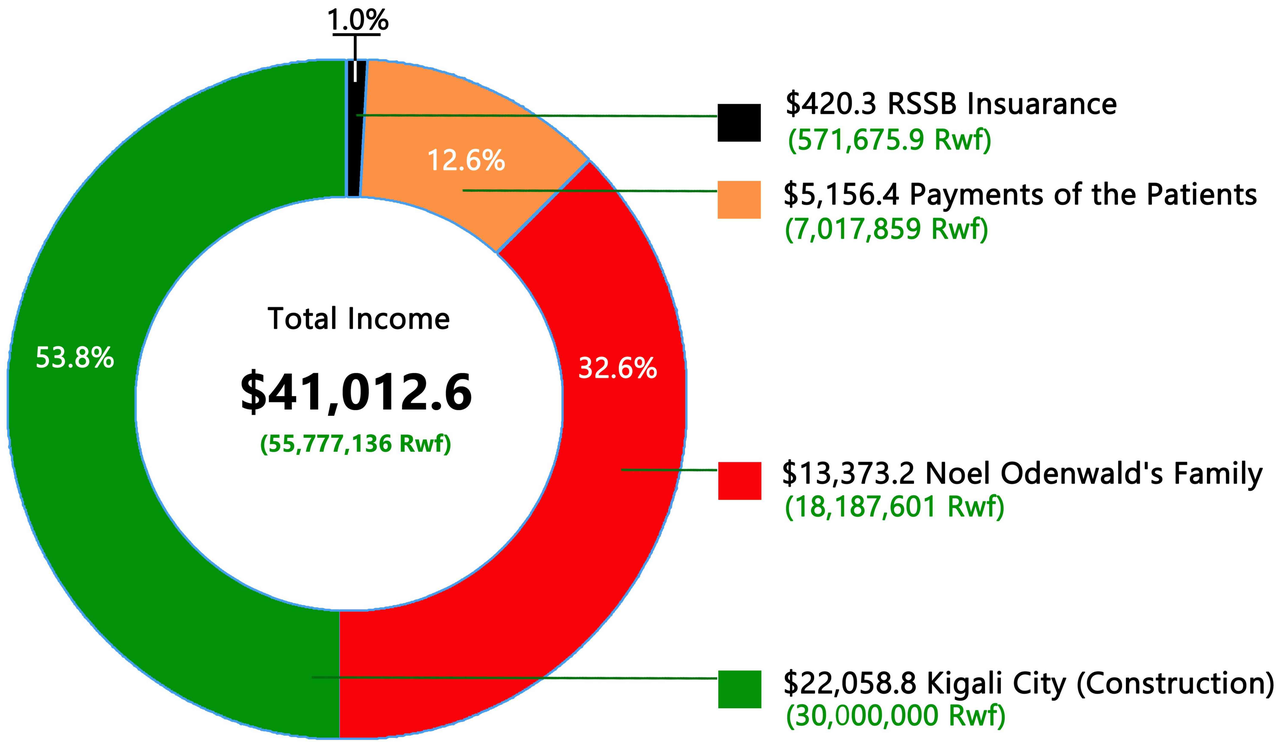

Successfully collaboration

The Founder Noel S. Odenwald of Home for Hope Foundation and Pauline Umwali the District Executive Administrator of Gasabo District, have successfully collaborated on key interventions, notably the health project, Odenwald Clinic, which commenced operations in December 2023. This significant milestone marks a major step forward in enhancing healthcare services in the community.
